

JOB PROFILE

Lead Frontend Developer

OUR COMPANY

Our award-winning startup dive solutions provides web-based CAE solutions for engineering companies. Our in-house software utilizes novel particle-based technologies to simulate fluidic processes in complex mechanical systems. We accelerate development processes and decision making. Our dogma: We create beloved world-class software to help engineers design more sustainable products every day.

OUR CULTURE

We trust in creative people who love what they do. People who want to work on cutting edge technology that empowers engineers to make the world a better place. We believe in diversity, strong teams and healthy and friendly culture of trust, constructive feedback and empowerment. Work is not a job. Work is being passionate about something, meeting great people and building something you believe in.

YOUR MISSION

You co-architect the world's best engineering web software and leverage the power of our simulation software for our users.

YOUR TASKS

- You lead our frontend development (including: software architecture, 3D-geometry processing, remote and local rendering and scientific data postprocessing).
- You draft and implement UI/UX concepts in line with scientific and engineering standards.
- You assist in backend and cloud stack development.

YOUR PROFILE

- ✓ You have 3+ years of professional experience working with JavaScript, HTML5, CSS3.
- ✓ You have a natural understanding of UX and UI design.
- ✓ In your professional endeavors, you have worked with a minimum of two Frontend-Frameworks (e.g. Vue, React, Angular, jQuery).
- ✓ You have already worked on large software projects in an agile environment.
- ✓ You have basic experience in working with backend technologies (e.g. RESTful APIs).

OUR OFFER

- ❖ Inspiring culture of creativity, failure and improvement, fast decision making, best-ideas-win philosophy.
- ❖ Personal and extensive onboarding, professional and personal development opportunities, team and network of internationally operating experts.
- ❖ Product demonstration meetups, company team-ups, joint voluntary service.
- ❖ Central workplace in Berlin, amazing IT equipment & tech talks to spread knowledge.
